

# SOLIS

## 5-Point, Ligature-Resistant Locking Solution

Securitech's Solis line offers healthcare facilities an ergonomic, innovative solution for ligature-resistant locksets.

Made in the USA in collaboration with the nation's best behavioral healthcare consultants, Solis is ADA-compliant and ligature-resistant. Low profile to reduce safety hazards with an anti-microbial finish, Solis stands up to the fast-paced, high-impact conditions and sanitary standards necessary for behavioral healthcare facilities.

# SOLIS™

Securitech's patented ligature-resistant door hardware provides the highest level of anti-tie, 5-point protection, while respecting the goal of providing aesthetic hardware. This aids the creation of a tranquil behavioral healthcare environment for patients. The architectural design, combined with the unique lever tapering, remain the industry standards for safety.

Its sleek design elements are not only ligature-resistant, but also promotes tranquility, complementing the healing environment. Solis locksets offer smooth operation, requiring only 35 degrees of movement to employ. Independent support springs in the escutcheon with internal stops limit lever movement, provide for easy operation, and offer anti-tie protection..

Solis can meet your operating needs with different functions and options, including additional electric release options. Solis represents Securitech's response to the growing need for code-compliant solutions within psychiatric and rehabilitation facilities, behavioral healthcare facilities, and hospital mental health wards.

## SOLIS: Ligature-Resistant Locking Solution

- ADA-Compliant, Anti-Tie Solutions Created by Experts
- Low-Profile, Ergonomic Design
