\* Power Supply Provided

### How Does It Work?

Multi-Point Mota uses motorized turnpiece to project all the deadbolts simultaneously project all the deadbolts. Interior lever retracts all of the bolts simultaneously for one-motion exiting.

### Available Options:

- Currently only available in lever by lever;
- Lever Exterior Optional, Lever Only Interior.
- Interior turnpiece
- Turnpiece & Self-Relock
- No Interior Locking Function
- Exterior Cylinder Only Available
